DRIVE SHAFT MEASUREMENT:

There is one measurement you will be required to provide us.

You must measure from the seam between the forward flange and differential flanges straight to the seam between the CV flange and the transfer case flange. Vehicle MUST be on the ground for this measurement. Please provide the measurement to the nearest 1/8".

Important: Suspension must be at Normal Ride Height.
Wheels on Ground or Diff. Loaded (wheels not hanging on lift)

Please take all length dimensions from vehicle - NOT the old driveshaft

Drive shaft length in inches: _____
